PHP, Java, JavaScript, Python, SQL, VB.NET

Frameworks

Laravel, Livewire, Yii2, Spring Boot, React.js, Vue.js

Frontend

Tailwind CSS, Bootstrap, Alpine.js, HTML5, CSS3

Database

MySQL

Tools

Git, Bitbucket, Forge, Envoyer, SiteGround, Hivelocity, Figma, Generative AI

PROFESSIONAL EXPERIENCE

Full Stack Developer (Freelance)

Live Life Stronger (New York-based)

10/07/2025 – 05/2026

- Developed and maintained 20+ e-commerce and service-based web applications using Laravel, Livewire, Tailwind CSS, Alpine.js, MySQL, and JavaScript.
- Built customer-facing platforms for wellness products, booking systems, and service-based businesses serving thousands of end users.
- Designed and implemented backend logic, database structures, payment workflows, and responsive front-end interfaces.
- Improved system performance, SEO, and user experience by optimizing applications using Chrome DevTools Lighthouse.
- Enhanced deployment workflows using Bitbucket, Envoyer, Forge, SiteGround, and Hivelocity, transitioning from manual updates to repository-driven deployments.
- Reduced deployment time and improved development efficiency through automated and structured release processes.
- Maintained and optimized production systems supporting 2,000+ users across multiple platforms.

Full Stack Developer

Stealth Solutions and Digital Marketing

20/02/2024 – 30/06/2025

- Developed and maintained 50+ e-commerce and marketing websites using Yii2, Laravel, JavaScript, MySQL, AJAX, Bootstrap, Vue.js, and the TALL stack.
- Built scalable e-commerce and lead-generation platforms in the health, wellness, and personal care sectors.
- Improved website performance and SEO by optimizing applications using Chrome DevTools Lighthouse across multiple projects.
- Developed responsive UI components that improved usability and user engagement.
- Contributed to corporate websites, landing pages, and marketing campaigns.
- Implemented structured deployment and version control workflows using Bitbucket, improving release stability and collaboration.
- Helped transition from manual deployment processes to structured environment-based workflows, reducing production errors and improving efficiency.
- Collaborated with cross-functional teams to deliver business-focused digital solutions serving thousands of users.

EDUCATION

Bachelor of Science in Information Technology

Cavite State University - Imus

2016 – 2022

CERTIFICATIONS

- Figma UI/UX Cross Skill

Software Engineer

Norima Technologies

04/2022 – 12/2023

- Developed and maintained enterprise Policy Administration Systems for insurance industry clients using Java technologies.
- Modernized legacy applications by migrating monolithic Java systems into a modern architecture using Spring Boot and React.js.
- Developed business-critical backend services and automation processes using Java and Python.
- Worked directly with insurance-sector clients to analyze requirements, deliver solutions, and support system enhancements.
- Designed user interfaces and application workflows using Figma, improving collaboration between business and technical teams.
- Managed source control, code reviews, and collaborative development workflows using Git.
- Contributed to improved workflow efficiency and system reliability through continuous enhancement of core business applications.

Freelance Developer

10/2021 – 03/2022

- Developed a Medicine Inventory and Messaging System using PHP, MySQL, HTML, and CSS to streamline inventory management and communication processes.
- Designed and developed a community information portal for a local barangay featuring announcements, news, inquiries, and public information services.
- Built desktop and utility applications using Java SE, Python, and VB.NET [↗](#), including calculator and administrative tools.
- Managed full project lifecycles including requirements gathering, database design, development, testing, and deployment.
